

2024

UNITED BY X WAKE

The NEW X WAKE range has one mission: to uncage the next generation of Young Talent. Shread it, edge it, slide it – these bombproof boards are ideal for up-and-coming wake riders who need a wakeboard that can take a hard ride, and with the addition of the PEARGLIDE base , we’ve got decks for any riders covered.

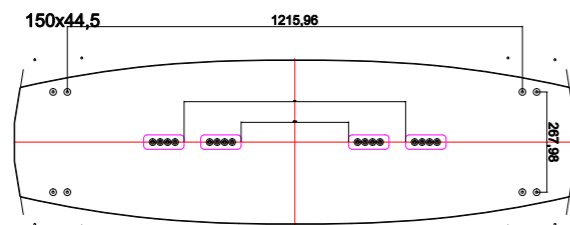

never stop developing

Why so creative?

Board development isn't just a process... it's about bringing a vision to life. Crafting a new board is more than starting from scratch – it's the journey of fulfilling the original vision.

It's not only our designers who invest their passion into creating something exceptional. Before a board is ready to hit the water, our creative team meticulously conceptualizes the visuals, construction, and all the vital details needed to breathe life into it.

Truthfully, this is one of our proudest achievements at X WAKE. The inspiration is ingrained in us, and it wants to

WAKE BOARDS 2024

TEAM ANNOUNCEMENT

We are stoked and proud at a time to welcome Courtney Angus to the global X WAKE team.

We at X WAKE pride ourselves on constant innovation and progression. Living up to the same expectations, Courtney Angus and the X WAKE HEXA range are an excellent match.

WELCOME TO THE TEAM COURTNEY !

BOSON

PARK / PERFORMANCE / INVERTS

The Boson by X WAKE is a high-performance wakeboard, designed with rigidity for optimal performance. Its unique narrow design, unlike conventional wakeboards, ensures swift turns, impressive pop, and smooth edge release.

The Boson features a concave shape for enhanced obstacle grip and gentler landings. The milled concave and multiple channels situated between the bindings prevent the board from drifting, ensuring stability during edging and landings. The Boson is shaped with a 3-stage rocker for added performance.

To top it off, the X WAKE Boson is fitted with channels on its upper surface. This not only reduces the board's weight and increases its stiffness but also imparts a strikingly futuristic aesthetic. Experience the next level of wakeboarding with the X WAKE Boson.

NEUTRON

NEUTRON

ALL TERRAIN / MULTI-PURPOSE

Introducing the Neutron, designed to provide the ultimate shredding experience. The advanced 3D shape allows for a rigid wakeboard center, while maintaining flexible tips for maximum pop and improved press control. Our innovative construction seamlessly blends the flexibility of a wood core with the strength of carbon fiber, resulting in a lightweight, durable, and highly responsive board.

The addition of channels enhances the Neutron's stability during landings and edging, while unique concave channels on the tips instill confidence on rails. Try it once, and you'll find it hard to ride anything other than the X WakeNeutron.

FEATURES

- Continuous rocker
- beveled ABS
- Multi channels

NEUTRINO 2024

ALL TERRAIN / MULTI-PURPOSE

The NEUTRINO, a lighter variant of the Neutron, is tailored for riders with a lower weight and those seeking the ultimate shredding experience. The NEUTRINO is lighter, softer, and slightly narrower than the NEUTRON, due to differences in construction and shape.

Its 3D shape allows for a rigid center of the board, while maintaining flexible tips for optimal pop and enhanced press control. Our groundbreaking construction combines the flexibility of wood with the strength of carbon fiber, resulting in a board that is lightweight, durable, and responsive. The unique concave channels on the tips provide stability during landings and edging, and boost confidence on rails. Experience the NEUTRINO and feel the difference!

QUARK 2024

GROOMS / MULTI-PURPOSE

BLACK

WHITE

Quark is our smallest board created for the youngest shredders. Extremely low weight and balanced flex guarantee that Quark is the perfect choice for young guns. The use of carbon fiber technology makes the wooden core thinner and lighter without losing durability and flexibility. Long side channels make the board very stable and easy going, ensuring a fast and easy progress for young wakeboarders. Highest quality grind base material allows kids to slide on cablepark features with ease transferring them to a next level of wakeboarding.

ELECTRON 2024

PARK / JIBBING / STYLE

Electron is a wakeboard designed for riders who crave an ultimate rails feeling and awesome pop. The board's flat bottom and soft flex enable you to explore new possibilities while shredding. The narrow stance of the board provides more confidence while shredding, making soft landings and sick presses more apparent than ever before. The board's unique construction, which combines wood and carbon fiber, along with its length and soft flex, creates a wakeboarding experience that you've never had before. Electron is perfect for riders who love jibbing and want to have never-ending fun on the water.

PETROL

METALIC GREY

ELECTRON 3.0 2024

ENHANCED JIBBING MACHINE

X wake electron 3.0 hexa base was created to push boundaries beyond everyday solutions. Obstacle riding in the park has evolved over the years and is now at level we could not have dreamed of.

Rider requirements are constantly changing and increasing, we want to withstand stringent requirements so we created hexa base.

Characteristic hexagonal structure was designed to break water surface tension while landing. Moulded base decreases friction on wakepark features and gives you smooth feeling even on dry obstacles.

FEATURES

- Continuous rocker
- New grindproof base
- Beveled ABS
- No channels
- Full carbon construction
- Full woodcore

ELECTRON 3.0 PRO 2024

SIGNATURE

by Courtney Angus

Hey there, I'm Courtney Angus, and I'm stoked to tell you about my pro model wakeboard, the X Wake Electron 3.0 Hexa Base. This board is an absolute game-changer on the water.

We designed it to elevate your park riding to a whole new level. The wakeboarding scene has evolved in incredible ways, and this board is my way of keeping up with those changes and pushing the boundaries.

One of the standout features is the hexagonal base. It's not just for show; it's there to disrupt water surface tension on landings. The result is smoother, more controlled landings that make a huge difference when you're hitting those park features. Plus, the reduced friction on wakepark features means you'll glide effortlessly, even on dry ones.

So, whether you're hitting the park features or perfecting your landings, my pro model board has got your back. Get ready to take your wakeboarding to the next level with the X Wake Electron 3.0 Hexa Base!

PROTON 2024

BOAT / INVERTS

Proton is shape made for excellent grip on the water behind the boat. We made a super stiff construction for high performance and reliability. Agressive multichannels make the board land and drive as easy as you can only imagine. 3 stage rocker decreases drag on the water while riding behind boat with proper speeds and gives you some extra POP. Bottom base is made for boat purpose only and is not designed to ride on wakepark obstacles.

FEATURES

- 3 stage rocker
- beveled ABS
- Multi channels
- Full carbon construction
- Full woodcore

PERGLIDE® SURFACE

LEVEL UP

thanks to the new type of board base glide, you will be able to enjoy the X WAKE models longer

UHMW-PE: Ultra High Molecular Weight PolyEthylene

UHMW-PE is a very abrasion resistant plastic material which is used to protect many different products and to improve their properties such as sliding and durability.

FEATURES

- excellent abrasion resistance and impact strength
- non stick and self lubricating surface
- excellent chemical resistance
- water repellent (Hydrophobic)
- excellent dielectric strength
- stress crack resistant
- low coefficient of friction
- surface is easy to structure (e.g. grinding)
- long service life without loss of function

TEAM & PASSION

As a top sports team, we are well aware that we couldn't have gotten to where we are today if it weren't for our disciplined and talented wakeboarders. Read on to learn more about the individuals who work day and night to help our team succeed.

OUR VISION - EXCEED THE EXPECTATION

X WAKE is the first choice for passionate wakeboarder. Our wakeboards combine experience with proven technologies that enable our customers to challenge and exceed their limits. For each individual X WAKE product we define the needs of our customers in advance. We measure our performance by how we meet these needs.

For our customers, wakeboarding is a part of life: they ride with pure passion, love the feeling of freedom, surround themselves with people that share this excitement and expect a product with the highest performance.

We never sacrifice our high-quality requirements in favor of profit, and work according to the premise “form follows function”. This philosophy determines the entire technical development and design process. In our company, 20 years of experience in the kiteboarding and wakeboarding industry meets the future — and our products are the result of this, made in POLAND.

We have been fulfilling this need since X WAKE was established with functional, design-worthy and long-lasting products, made in LOXEE – and the confidence that you always make the right choice with a X WAKE wakeboards.

TECHNOLOGY

NEW GRINDBASE **PERGLIDE® SURFACE**

Carbon construction

4 layers of carbon fiber, two on each side of the woodcore gives a board perfect strength and amazing pop. Carbon construction makes a board lighter than other boards and provides fast response when edging the board. Carbon fiber also gives extra pop to your board.

3D CNC Milled Shape

To get a good POP every good board need solid and long grained wood core. The CNC milled Paulownia wood core is the heart of every X WAKE board.

CONTINUOUS ROCKER

Continuous Rocker

Continuous rocker gives a smooth, fluid curved shape. Boards with continuous rocker give smoother, faster ride, softer landings, and easy carving.

Triple C Channels

CCC are channels to help with carving and especially air tricks, helping you to lock in your edge and pop stronger and higher. Also you can find it helpful when pressing on rails and land on the water.

3 STAGE ROCKER

Three Stage Rocker

3-stage rocker profile has three distinctive planes shape. This makes the board go higher when pop and add extra stability when land. However, this rocker also makes the board go a bit slower on the water. Such rocker is more suitable for intermediate and advanced riders

Boot Tough Inserts

Wakeboarding is nothing without boots. Boots take huge damage every time when you fail hard. X wake boards are equipped with tough reinforced inserts to prevent ripping your boots off the board.

Multi Channels

Multiple channels on your board work as long, extruded fins which break the surface tension upon landing; they also help to direct the water flow. Some of them made to help you get better "locking" on wake obstacles.

Vee tip channels

V shaped channels on nose and tail of wakeboard give you extra confidence on rails and extra stability on the water

Wood Core

To get a good POP every good board needs a solid and long grained wood core. The CNC milled Paulownia wood core is the heart of every X WAKE board.

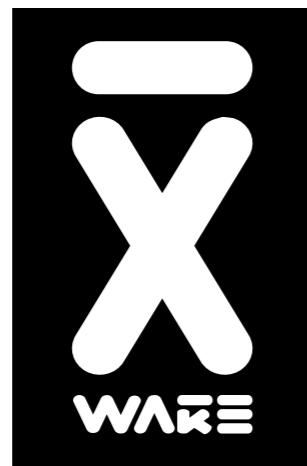

Hexa Base

Characteristic hexagonal structure was designed to break water surface tension while landing.

Moulded base decrease friction on wakepark features and gives you smooth feeling even on dry obstacles.

The base is moulded to avoid unpleasant grip and prevent damage when hit.

APPAREL

The 2024 X WAKE team wear collection is a cool range of apparel. Select from our t-shirts, quick-dry hoodies, hoodies and caps for both men and women and show that you're joining a new era.

QUICK DRY HOODIE

Technical hoodie protects you from the wind and from cooling down. Since it is more flexible than a neoprene alternative, it is very comfortable to wear. Even in summer the hoodie can be worn with a shorty or without a wetsuit. The cozy inner lining hardly stores any water and is nice and soft on the skin.

BLACK

WHITE
